

# Zouch eFoam

---

## Product Classification eFoam - D series

eFoam - D series is a closed-cell polyethylene foam crosslinked by electron beam irradiation. It can be supplied as rolls of material, and the chemical crosslinking agent is not added.

Density Range: 30-460kg/m<sup>3</sup>

Fold Range: 20 Folds

Thickness Range: 1-12.7mm

### Characteristics of the product:

- The same functions as V series
- Stronger non-slip ability of surface
- Better fitting property
- With rubber characteristics

### Usage of product:

- High-performance washer, adhesive tape
- Shoe industry, building thermal insulation and sealing material
- Sport pad, protective products
- Automotive Interior Material
- Medical goods
